## 1 Postdoc and 1 PhD position

**We offer:** 1 postdoc and 1 PhD position to work on the synthesis and subsequent characterization of new molecular materials on surfaces. The main experimental techniques to be used will be scanning tunneling microscopy and spectroscopy, atomic force microscopy and photoemission spectroscopy.

**Requirements:** PhD or master degree, respectively, in physics, chemistry, or engineering.

Previous experience with ultra-high vacuum, low temperature and/or scanning probe microscopies will be positively evaluated but are not strictly necessary.

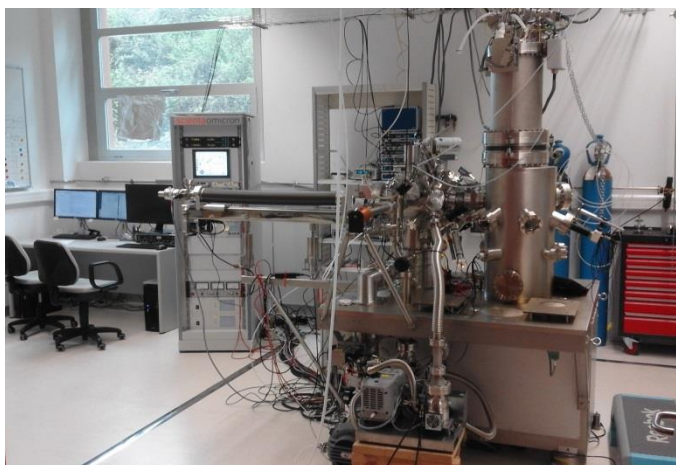

**Where?** At the Donostia International Physics Center, San Sebastián (Spain).

**When?**

As soon as possible

**Please contact:**
